## "When the stone becomes the Jewell"

### MINERAL EXPLORATION and JEWELS CREATED first expériences

#### Mineral exploration first experiences at home

(please, answer here in 10 lines)

Description of the first mineral exploration with students at home...

Where was the mineral exploration?

When took place this exploration?

What kind of minerals?

How many students have participated?

How did you explore them?

The first mineral exploration for our Institute (I.I.E.K. "MOKUME" of THESSALONIKI) took place on two open air excavations of white marble at the foot of Pangeo mountain, near the city of Kavala, about 140 Km from Thessaloniki.

When the students saw at the open air excavations how the marble is excavated, they visited two marble factories in the area in order to take knowledge what are the ways of the marble elaboration.

The students had, also, the opportunity to pick pieces of marble in order to use them for the creation of jewels.

In the exploration, participated 10 students of the second year of the specializations of "hand-made jewellery", "cast jewellery" and "design of jewellery".

The project took part on the 10<sup>th</sup> of November.

#### Jewels created by students with mineral first experiences
