COMENIUS MEETING – SAINT-AMAND MONTROND – 18 / 22 JANUARY 2009

"When the stone becomes the Jewell"

First Visit of the COMENIUS TRAVELLING EXHIBITION and Second MINERAL EXPLORATION

First Visit of the COMENIUS TRAVELLING EXHIBITION

Description of the first visit of the Comenius Travelling Exhibition...

Where was the visit?

When took place?

How many students have participated?

The first visit of the Comenius Travelling Exhibition, for a group of three students and two professors of our Institute (I.I.E.K. "MOKUME" of THESSALONIKI), took place in Saint-Amand Montrond, France, from the 18th to 22nd of January 2009.

The delegation of our Institute had the possibility to be present to the inauguration of the exhibition the 19th of January.

Also, our delegation had the possibility to visit the Lycee Professionnel Jean Guehenno in Saint-Amand Montrond, the days of 19th and 20th of January 2009, having an interesting dialogue with students and professors about the programs of studies in jewellery and having an interesting exchanging of experiences.

Second MINERAL EXPLORATION

Description of the second mineral exploration with students...

Where was the mineral exploration?

When took place this exploration?

What kind of minerals?

How many students have participated?

How did you explore them?

The second mineral exploration for our Institute (I.I.E.K. "MOKUME" of THESSALONIKI) took place on one open air excavation of volcanic stone, near the town of Volvic, in the region of Clermont-Ferrand, France.

Our students had the opportunity to pick pieces of volcanic stone in order to use them for the creation of jewels for the Comenius Travelling Exhibition of the years 2009-2010.

When our delegation (three students and two professors, with two professors of the Lycee Professionnel Jean Guehenno of Saint-Amand Montrond, who was our guides) saw at the open air excavation how the volcanic stone is excavated, visited an artistic school of elaboration of volcanic stone in the town of Volvic.

The mineral exploration took part on the 21st of January 2009.
